

IKA EKO

GILDING WASHI
Made in Japan

As a producer of Kozo (Paper Mulberry) and Mitsumata (Paper Bush), the materials used in Japanese paper. Ikazaki have been a center of papermaking. The history of washi (Japanese rice paper) production in Ikazaki dates back thousands of years. And 350 years ago, the feudal Ozu realm began promoting paper production as an important revenue source. Unique hand-made Japanese paper was born blessed with the mountains that surround the town and the river that flows through it. Here, the knowledge and skills of papermaking have been transmitted for generations. we wish to create a new vision for the future – a vision that reflects our tradition of co-existence with nature through washi.

Now we will announce brand new design Ikazaki Gildinf Washi Wallpaper.

<Gabor Ulveczki(Gilding Master)>

Born in Budapest, Hungary live in France, Gabor designs and creates wallpaper, art installations, and other interior d 残 or products. Working at the request of the Uchiko-cho Chamber of Commerce and Industry, he has provided technical assistance in the product development of wallcovering works using handmade washi with Gilding patterns since 2008and 2009.

<Gilding>

To gild patterns with five different colours metal leaves. Oxidised and colored metal leaves show marvellous colour and brightness on patterns.
